

MASTERCLASS

MYCOTOXINS FROM FIELD TO FEED

Discover the Masterclass on Mycotoxins: From Field to Feed – your ultimate guide to understanding mycotoxins, presented by experts from across the globe. With six insightful webinars and a 1.5-day gathering, Explore into the world of mycotoxins affecting poultry, pigs, cattle, fish, horses, and household pets.

From fundamental knowledge to the latest innovations and developments, This masterclass covers it all from an Introductory basis up to recent advances in prevention and treatment strategies for mycotoxins, risk analysis, and the adaptation to climate change. In addition to acquiring knowledge, participants will also be awarded the Mycotoxin Book, which specifically focuses on animal feed. The editor of this book is Dr. Regiane R. Santos, and it is authored by mycotoxin experts from around the globe.

Regiane R. Santos

Seminar

September

A unique opportunity during the Masterclass is the meeting in September. With 11 experts from around the world presenting their findings, this event offers a chance to collaborate closely on complex issues. With plenty of opportunities to engage with the speakers, exchange thoughts, and network with other people working with mycotoxins.

The program covers a wide range of animal species and addresses topics such as prevention, treatment of contaminated feed, climate change, and risk assessment.

Here's a brief snippet about some of our speakers:

- Dr. Antonio Gallo (Mycotoxins and ruminants, Italy)
- Dr. Gunther Antonissen (Mycotoxins and poultry, Belgium)
- Dr. Guro Brodal (Mycotoxins in feedstuffs, Norway)
- Dr. John Tegzes (Mycotoxins and pets, USA)
- Dr. Isabelle Oswald (Risk assessment, INRAe, France)
- Dr. Angel Medina (Climate change, UK)
- and of course Dr. Regiane R. Santos (SFR)
